

POOL QUICK FACTS

Pool Name: _____

Pool Location: _____

Length: _____ Feet Width: _____ Feet

Surface Area: _____ Sq. Ft. Max Bathers: _____

Total Gallons in Pool: _____ Filter Type & Size: _____

Turnover: _____ Hours Flow Rate: _____ GPM

Primary Sanitizer: Gas Chlorine Liquid Chlorine Cal Hypo
 Trichlor Dichlor Bromine Ozone Lithium Hypo

The sanitizer level to be maintained in this pool is: _____ ppm

Amount of sanitizer needed to raise free available chlorine by 1 ppm in this pool is:

Sodium Hypochlorite (12%)	Sodium Hypochlorite (10%)	Calcium Hypochlorite (65%)
_____ gal. _____ fl.oz.	_____ gal. _____ fl.oz.	_____ lbs. _____ oz.

pH Adjuster: Muriatic Acid CO2 Soda Ash
 Sodium Bicarb Sodium Sesquicarbonate

Amount of Sodium Bicarb needed to raise Total Alkalinity by 10 ppm in this pool: _____ lbs. _____ oz.

Amount of Calcium Chloride needed to raise Hardness by 10 ppm in this pool: _____ lbs. _____ oz.

Amount of Cyanuric Acid needed to raise Stabilizer by 5 ppm in this pool: _____ lbs. _____ oz.
