No person may install or repair a semi-public water supply nor install a private water well supply unless he or she is a licensed well contractor in accordance with the Water Well Standards Act of 1985, O.C.G.A. Sections 12-5-120 et seq.

A coliform test performed by an approved lab shall be required upon completion of construction and following disinfection of the system. The sample results must be satisfactory before final construction can be approved. – DPH Drinking Water Supply Rules Chapter 511-3-3-.0(4)

Sampling of unapproved or non-complying wells shall be at the Health Authority’s discretion. – DHR Drinking Water Supply Rules Chapter 511-3-3-.03(5)

Please contact the Environmental Health Section of the Crisp County Health Department, (229) 276-2680, following construction, disinfection and submittal of the well log, in order to schedule a time for collection of sample. The water sample cannot be taken without having received the well log from the

Issuance of a wellhead protection permit, and subsequent approval of the water sample by representative of the Georgia Department of Public Health or Crisp County Board of Health shall not be construed as a guarantee that such private water well will function satisfactorily for a given period of time; furthermore, said representative(s) do not, by any action taken in effecting compliance with Well Water Standards Act, assume any liability for damages which are caused, or which may be caused, by the malfunction of such private water well.
